

# App4Legal.v8.0 Release Notes

## Important highlights from this release

- Introducing a new fully-fledged Contract Module that manages the complete life-cycle of a contract from initiation to drafting and signature. The Contract Module is highly configurable and customizable and facilitates the collaboration between both parties.
- Users can now rely on the new dashboard to keep up with their meetings, tasks, due dates, logged hours, and many more metrics that help users on a daily basis.
- The Contacts and Companies in App4Legal now support advanced categorization to help users organize their database into Leads, Prospects, Clients, Partners, etc...
- A new report that shows Company Groups along with the subsidiaries and their related Litigation Cases, Corporate Matters, Contracts, and Intellectual Properties.
- App4Legal Core users can now set watchers on the customer portal Matters and send an email notification to clients when a Matter is created on his behalf.
- Bug fixing & Minor Enhancements.
